Excellence in education of
Interventional Pain Physicians

COMPREHENSIVE PAIN MEDICINE AND INTERVENTIONAL PAIN MANAGEMENT

2011 BOARD REVIEW COURSE

Review for preparation: American Board of Medical
Specialties–Subspecialty Certification in Pain Medicine
(August 1-5)

- A five-day review covering anatomy, physiology, pharmacology, psychology, ethics, interventional techniques, non-interventional techniques, controlled substances and practice management
- 42 unique lectures by experts in the field
- Extensive evaluation sessions with daily pre-test, post-test, and review of questions

Voice of Interventional
Pain since 1998

On behalf of the Board of Directors of the American Society of Interventional Pain Physicians (ASIPP), I would like to invite you to one of the most comprehensive and useful educational conferences available anywhere. The ASIPP 7th Annual Comprehensive Board Review Course in pain medicine and interventional pain management will be held at the **Chase Park Plaza**, in St. Louis, Missouri, during the week of August 1-5, 2011.

This year's review course has been expanded, revised, and updated. We have incorporated the complete revised version of the ABMS pain medicine subspecialty content outline.

This intensive and comprehensive high-quality review will prepare physicians appearing for the American Board of Medical Specialties (ABMS)—Subspecialty Pain Medicine examination and for the American Board of Interventional Pain Physicians (ABIPP)—Part 1 examination. Remember, some of these areas are not even taught in medical school and training programs. In a dynamic world, with daily changing rules and regulations, it is essential to keep yourself updated.

- A five-day review covering anatomy, physiology, pharmacology, psychology, ethics, interventional techniques, non-interventional techniques, controlled substances and practice management
- 42 unique lectures by experts in the field
- Participants can earn up to 41.5 AMA PRA Category 1 Credits
- Extensive educational materials
- Extensive evaluation sessions with daily pre-test, post-test, and review questions

In addition to the review course, on Saturday, August 6, the American Board of Interventional Pain Physicians offers the opportunity for examination in order for physicians to complete requirements for ABIPP Part 1.

We hope you will join us in exciting St. Louis, Missouri, for this once-a-year educational event. Whether you have practiced pain medicine or interventional pain management for years, if you are new to the discipline, or if you are in training— the ever-changing field of medicine, practice management, and rules and regulations associated with these specialties makes this an essential course for you.

Sincerely,

Laxmaiah Manchikanti, MD
Chief Executive Officer and Chairman of the Board, ASIPP

Statement of Need

This five-day intensive Review Course in IPM is planned as a CME activity to prepare physicians seeking board certification, re-certification, or an in-depth review of the specialty of interventional pain medicine. This review course will be based on the specifications of subspecialty in pain medicine examination of The American Board of Anesthesiology, Physical Medicine and Rehabilitation, and Neurology and Psychiatry. This review course will also meet 90% curriculum of ABIPP Part 1.

This course will provide an in-depth evaluation of the knowledge of the participating physicians with extensive pre-course and post-course Board Review examinations, daily pre- and post-tests, and review of the questions daily.

As part of this comprehensive, in-depth, intense five-day review course in IPM, we will provide you with the following:

1. Syllabus with outlines of the lectures and accompanying questions, distributed at the meeting.
2. Daily Pre and Post Exams.
3. Daily exam results provided on-site for an optimum review experience.

Registration fees include all sessions, continental breakfasts, lunch, coffee breaks, syllabus, a CD-ROM, questionnaires, answer sheets, and daily tests with results. Registration will be on a first come, first serve basis. Organizers reserve the right to alter the schedule based on the number of attendees and speakers, etc.

Features

The 7th Annual Comprehensive Interventional Pain Management Board Review Course includes five full days with an expanded curriculum designed to prepare physicians for the ABIPP Part 1 Certification Exam and ABMS Pain Medicine Certification or Re-certification. The Review Course also provides a comprehensive review of interventional pain management for practitioners and fellows.

- Comprehensive Review of ABMS Pain Medicine Curriculum
- Comprehensive Review of ABIPP Part 1
- Detailed Syllabus and CD-ROM
- Daily Pre- and Post- Practice Tests
- Review of Questions

Americans with Disabilities Act & Special Services

Organizers fully comply with the legal requirements of the Americans with Disabilities Act and the rules and regulations thereof. If any participant in this educational activity is in need of accommodations, please contact the organizers at (270) 554-9412 at least 10 days prior to the conference.

There is no commercial support for this activity.

Audience/Objective/Outcomes

This comprehensive Review Course is intended to present pain management specialists seeking board certification, re-certification, or an in-depth review of the specialty with an overview of the anatomy, physiology, diagnosis, and treatment of a wide range of painful disorders, in order for participants to pass certification or re-certification and obtain in-depth review; and therefore be able to provide improved interventional management, controlled substance management, and practice management.

Accreditation Statement

This activity has been planned and implemented in accordance with the Essential Areas and Policies of the Accreditation Council for Continuing Medical Education (ACCME) through the joint sponsorship of the Institute for Medical Studies and the American Society of Interventional Pain Physicians. The Institute for Medical Studies is accredited by the ACCME to provide continuing medical education for physicians.

Category I Credit

The Institute for Medical Studies designates this educational activity for a maximum of 46.5 AMA PRA Category 1 Credits™. Physicians should only claim credit commensurate with the extent of their participation in the activity. These hours include the Comprehensive Board Review Course ONLY.

Hotel Information

Chase Park Plaza
212 N Kingshighway Blvd., St Louis, MO 63108
(314) 633-1000

The discounted nightly rate of \$149 applies only to those who register on or before July 10, 2011. Ask for the ASIPP room block when registering.

No duplication or distribution of materials, or recording of lectures associated with this conference is permitted without express written consent of the American Society of Interventional Pain Physicians. All rights reserved.

DAY 1

MONDAY AUGUST 1, 2011

7:00am–8:00am

REGISTRATION & CONTINENTAL BREAKFAST

8:00am–8:45am

Introduction: Laxmaiah Manchikanti, MD

8:45am–10:30am: **PRETEST & BREAK**

10:30am–12:00pm

EVIDENCE-BASED MEDICINE: DESIGNING, REPORTING, AND INTERPRETING CLINICAL RESEARCH STUDIES

Basic concepts of evidence-based medicine with critical analysis of literature; principles of valid clinical research; effects of analysis on the clinical applicability of study results; components of clinical trials; special features of study of pain; and other aspects.

Laxmaiah Manchikanti, MD

12:00pm–1:00pm: **LUNCH**

1:00pm–1:45pm

ETHICAL STANDARDS IN PAIN MANAGEMENT AND RESEARCH

Includes ethics of pain management and research; professional and quality assurance; ethical standards of research design, review and implementation, informed consent, and use of animals. **Kelly Dineen, JD**

1:45pm–2:30pm

ANATOMY, PHYSIOLOGY, AND PHARMACOLOGY: MECHANISMS OF NOCICEPTIVE, TRANSMISSION, AND PHARMACOLOGY

Description of peripheral mechanisms; central mechanisms: spinal and medullary dorsal horns, segmental and brain stem, thalamocortical; and other mechanisms. Also includes pharmacology of pain transmission and modulation with experimental models and limitations, peripheral mechanism of pain transmission and modulation; synaptic transmission of pain in the dorsal horn; central sensitization; neurotransmitter involvement in pain modulation; and other aspects of pharmacology of pain transmission and modulation.

Miles Day, MD

2:30pm–3:15pm

ASSESSMENT AND PSYCHOLOGY OF PAIN

The lecture includes pain as a subjective, multidimensional experience; basic concepts of introspection and measurement of subject experience; measurement of pain in special populations with challenges and limitations; direct pain measurement with self reports; indirect pain measurements with observation; basic issues of outcome measures in clinical studies; requirements of outcome measures in studies of the impact of pain; and other aspects. **Jeffrey W. Janata, PhD**

3:15pm–3:45pm: **BREAK**

3:45pm–4:30pm

RESEARCH IN ANIMALS AND PLACEBO

Will discuss common animal models in the study of pain; ethics of animal experimentation; definitions and incidence of placebo effect, along with historic aspects; mechanisms and interpretation of placebo response; role of placebo in clinical trials; response bias with role of placebo in clinical trials; ethics of placebo in clinical trials and clinical practice; open-hidden paradigm; and placebo as treatment modality; and nocebo effect.

Sukdeb Datta, MD

4:30pm–5:15pm

MUSCULOSKELETAL AND MYOFASCIAL PAIN

The lecture describes epidemiology, anatomy and physiology; mediators of inflammation, tissue destruction, and repair; molecular and cellular basis of immunity and autoimmunity; neurophysiology; psychosocial aspects; classification and clinical characteristics of muscle, musculoskeletal, and myofascial pain; assessment; common clinical characteristics; and evidence-base for treatment. **Miles Day, MD**

5:15pm–6:00pm

REVIEW OF QUESTIONS: ALL FACULTY

DAY 2

TUESDAY AUGUST 2, 2011

7:00am–8:00am: **REGISTRATION & CONTINENTAL BREAKFAST / PRETEST**

8:00am–8:45am

Epidemiology of Chronic Pain

The lecture describes epidemiologic studies of pain; measurement of burden in a population, including epidemiologic measures of occurrence (prevalence, incidence); observational studies: use and limitations; major risk factors for development of chronic pain; the role of cohort studies; use of risk factors to guide treatment; and other aspects. **Eugene Pereira, MD**

8:45am–9:30am

Psychosocial and Cultural Aspects of Pain

Includes definition and measurements of pain as a biopsychosocial experience; individual differences in effective, cognitive, and behavior responses to pain; definition and effect on pain experience and response to treatment with coping styles; effect on disability, treatment outcome, maintenance of treatment effects of expectation, coping, cultural and environmental factors; cultural, environmental, and racial variations in experience and expression of pain; role of family in promoting illness and well behavior; and common emotional problems and psychiatric disorders associated with pain. **Jeffrey W. Janata, PhD**

9:30am–10:15am

Pain Management in Patients with Cognitive Impairment and in Areas of Deprivation and Conflict

The lecture includes conditions leading to limitations in ability to communicate; difficulties in assessment and treatment of pain; role of caregivers and social context in assessment and treatment of pain in individuals with limited ability to communicate due to cognitive impairment; variability of availability and access to adequate pain treatment worldwide; causes of pain worldwide; spectrum of providers caring for patients with pain worldwide; limitations of education training and knowledge of pain and its treatment; research; and inadequacy of access to drugs and palliative care in many countries.

Frank Falco, MD

10:15am–10:45am: **BREAK**

10:45am–11:30am

Psychological Treatments

Includes cognitive and behavioral strategies with application to specific pain syndromes; integration of approaches; stages of behavioral change and their effect on readiness to adopt self management strategies for chronic pain; common process factors of cognitive behavior and self-management interventions. **Jeffrey W. Janata, PhD**

11:30am–12:15pm

Radiologic Evaluation

This lecture includes basic aspects, uses and limitations of MRI, fMRI, and MR spectroscopy and PET scans, along with general aspects of radiology with description of various aspects of fluoroscopy, CT scanning, MRI, and PET scan. **Sheri Albers, DO**

12:15pm–1:15pm: **LUNCH (provided)**

1:15pm–2:30pm

Practical Aspects of Imaging

Discussion and description of imaging modalities and evaluation of findings for interventional pain management: Fluoroscopy, CT scanning, MRI, and PET scan. **Sheri Albers, DO**

2:00pm–2:45pm

Clinical Nerve Function Studies

Description includes uses and limitations of EMG/NCV/evoked potentials; uses of laser-evoked potentials; uses and limitations of quantitative sensory testing; assessment of innervation and density with skin punch biopsy; uses of EEG and MEG; and other general aspects of clinical nerve function studies. **Frank Falco, MD**

2:45pm–3:30pm

Opioids

Describes pharmacokinetics, pharmacodynamics, adverse effects, drug interactions, and indications and contraindications; classification of opioid compounds; pharmacology of pain transmission and modulation; and other aspects. **Alan Kaye, MD**

DAY 2 (CONTINUED)

TUESDAY AUGUST 2, 2011

3:30pm–4:00pm: BREAK

4:00pm–4:45pm

Antipyretic Analgesics, Antidepressants, and Anticonvulsants

The descriptions include pharmacokinetics, pharmacodynamic, adverse effects, drug interactions, indications, and contraindications of nonsteroidals, acetaminophen, and phenazone derivatives, antidepressants, and anticonvulsants. Alan Kaye, MD

4:45pm–5:30pm

Electroanalgesia and Spinal Cord Stimulation

Describes postulated mechanisms and clinical applications and efficacy of spinal cord and peripheral nerve stimulation, along with indications, risks, associated complications; TENS, acupressure, acupuncture, electroacupuncture, and vibration. Ramsin Benyamin, MD

5:30pm–6:00pm: POST TEST

6:00pm–7:00pm: REVIEW OF QUESTIONS

DAY 3

WEDNESDAY AUGUST 3, 2011

7:00am–8:00am: REGISTRATION & CONTINENTAL BREAKFAST / PRETEST

8:00am–8:45am

Controlled Substances: Use, Abuse, and Pain Relief in Substance Abusers

The definitions of addiction vs. tolerance vs. dependence and withdrawal symptoms; opioids in chronic non-cancer pain use and abuse; biopharmacologic and neurophysiologic basis of addiction; interaction between addiction and pain; screening for drug abuse or addiction in patients with pain; principles of comprehensive approach to pain management in patients with addictive disease, active or in recovery; pharmacologic treatment of patients with addiction; acute pain management of patients with active addiction or in recovery; analgesic response to opioids in patients with addiction; risks and benefits of opioid use in treatment of patients with chronic and cancer pain in patients with abuse or addiction; needs of special populations or treatment groups of patients with addiction; legal, regulatory, reimbursement issues limiting access to care for patients with pain and addiction. Andrea M. Trescot, MD

8:45am–9:30am

Intrathecal Drug Delivery Systems

Infusion and intrathecal drug delivery, indications, risks, and associated complications, and other aspects. Peter Konrad, MD

9:30am–10:15am

Surgical Pain Management

Includes indications, risks, and associated complications of surgical lesioning of brain, brain stem, spinal cord, and peripheral nerves. Peter Konrad, MD

10:15am–10:45am: BREAK

10:45am–11:30am

Psychiatric Treatment of Pain

Psychiatric and psychologic modalities of chronic pain; pharmacotherapy for treatment of comorbid conditions; psychotherapy for depression; differential diagnosis of anxiety conditions; anger in chronic pain patients and relation to perceived pain; somatic complaints in chronic pain; role of family; role of patient beliefs and expectations in pain and disability and coping strategies; diagnosis and evaluation of sleep disorders in chronic pain; frequency of personality disorders with evaluation of work history and education in evaluation of chronic pain. Jeffrey W. Janata, PhD

11:30am–12:15pm

Miscellaneous Pharmacologic Agents in Pain Medicine

The description includes pharmacokinetics, pharmacodynamics, adverse effects, drug interactions, indications and contraindications of neuroleptic drugs, antihistamines, analeptic drugs, corticosteroids, muscle relaxants and antispasticity drugs, NMDA antagonists, local anesthetics and membrane-stabilizing drugs, sympatholytic drugs, and miscellaneous adjuvant analgesics. Alan Kaye, MD

DAY 3 (CONTINUED)

WEDNESDAY AUGUST 3, 2011

12:15pm–1:15pm: LUNCH (provided)

1:15pm–2:00pm

Physical Medicine and Rehabilitation

The descriptions include various modalities of treatment; temperature modalities; manipulation, mobilization, massage and traction; casting and splinting; exercise therapy; and other physical medicine and rehabilitation modalities of treatment.

Michael N. Brown, MD

2:00pm–2:45pm

Work Rehabilitation

The lecture includes the importance of early intervention and early return to work in reducing absence; psychosocial factors as the determinants of disability and as predictors of prolonged work of absence; identification of obstacles to recovery; components of successful comprehensive rehabilitation program; multidisciplinary approaches for those who do not return to work within a few weeks; and definition, usefulness and limitations of multiple capacity evaluation. Michael N. Brown, MD

2:45pm–3:30pm

Interventional Techniques

Descriptions include anatomy, pharmacology and use of drugs, diagnostic and treatment purposes, clinical indications, risks, associated complications of nerve blocks and neurolytic techniques; recognition and treatment of side effects; and other aspects of interventional pain management. Andrea M. Trescot, MD

3:30pm–4:00pm: BREAK

4:00pm–4:45pm

Complementary Therapies

The lecture includes range of available complementary therapies, alternative medical systems, biologically based therapies, manipulative methods, and energy therapy; prevalence and patient reasons for use of alternative complementary therapies; evidence-base; implications, costs and side effects, including drug interactions. Michael N. Brown, MD

4:45pm–5:30pm

Taxonomy of Pain and Acute Pain Management

Describes clarification of pain syndromes and application of systems with descriptions of epidemiology of inadequate control of pain; identification and control of physiological and psychological effects; pharmacologic properties of major classes of drugs used for pain; comprehensive plan for optimal perioperative pain management; non-pharmacologic treatment; clinical outcomes to be evaluated in an organized approach to pain; tools for assessment and measurement; role of patient and family education in improving pain management; and treatment of non-surgical pain. Andrea M Trescot, MD

5:30pm–6:00pm: POST TEST

6:00pm–7:00pm: REVIEW OF QUESTIONS

DAY 4

THURSDAY AUGUST 4, 2011

7:00am–8:00am: REGISTRATION & CONTINENTAL BREAKFAST / PRETEST

8:00am–8:45am

Low Back and Lumbar Radicular Pain (includes Sacroiliac Joint)

The lecture describes anatomy; causes and differentiation of low back and radicular pain; reliability, validity, limitations, indications, and validity of history, neurologic examination, medical imaging, diagnostic interventions, and electrodiagnostic testing; evidence base for commonly used interventions, including interventional techniques and surgical treatment; and use and limitations of multidisciplinary therapy. Sukdeb Datta, MD

8:45am–9:30am

Pain in Pregnancy and Labor

The lecture includes factors influencing the perception of pain in pregnancy compared with the nonpregnant state; causes of pain in pregnancy; principles of pain management in pregnancy; mechanisms and characteristics of labor pain; benefits and potential adverse consequences of labor pain; and management of labor pain. Andrea M. Trescot, MD

DAY 4 (CONTINUED)

THURSDAY AUGUST 4, 2011

9:30am–10:15am

Thoracic and Chest Wall Pain

The lecture describes anatomy; causes and differentiation of thoracic and chest wall pain; reliability, validity, limitations, indications, and validity of history, neurologic examination, diagnostic interventions, medical imaging, and electrodiagnostic testing; evidence base for commonly used interventions, including interventional techniques and surgical treatment; and use and limitations of multidisciplinary therapy. **Sukdeb Datta, MD**

10:15am–10:45am: **BREAK**

10:45am–11:30am

Neuropathic Pain and Complex Regional Pain Syndromes

Descriptions include definitions; epidemiology; clinical characteristics; pathophysiologic mechanisms, use and limitations of diagnostic studies; common neuropathic and complex regional pain syndromes; and therapeutic interventions. **Salim Hayek, MD, PhD**

11:30am–12:30pm: **LUNCH (provided)**

12:30pm–1:15pm

Geriatric Pain

Epidemiology; issues related to age differences; limitations of pain assessment; age related changes relevant to pain management; heterogeneity in physiologic, psychological, and functional capacity of persons of the same chronological age; and other aspects. **Salim Hayek, MD, PhD**

1:15pm–2:00pm

Visceral and Chronic Urogenital Pain

The lecture includes distinct clinical features of visceral pain; anatomy: peripheral and central mechanisms of visceral pain modulation; clinical differentiation of gastrointestinal urologic, gynecologic, and musculoskeletal pain; psychological principles in clinical assessment explanation and treatment; common causes, diagnostic evaluation, and treatment in men and women of urogenital pain. **Paul Christo, MD, MBA**

2:00pm–2:45pm

Neck Pain and Cervical Radicular Pain

The lecture describes anatomy; causes and differentiation of neck and radicular pain; reliability, validity, limitations, indications, and validity of history, neurologic examination, medical imaging, diagnostic interventions, and electrodiagnostic testing; evidence base for commonly used interventions, including interventional techniques and surgical treatment; and use and limitations of multidisciplinary therapy. **Rafael Justiz, MD**

2:45pm–3:15pm: **BREAK**

3:15pm–4:00pm

Cancer Pain

Describes palliative care, definition and scope, frequency of pain and multiple sites of pain, barriers to treatment, importance of development of evidence-based practice in the management of cancer pain; comprehensive evaluation, needs and approach of patients with cancer pain; principles of treatment including treatment of underlying disease, analgesic pharmacotherapy, integration of other modalities (e.g., physical, psychological, and anesthetic); analgesic ladder approach: indications, pharmacologic properties, therapeutic guidelines, adverse effects of opioids and other analgesics including drugs for neuropathic pain; indications, risks, and practical implications of anesthetic, surgical and interventional radiologic, and neurostimulatory approaches; usefulness of physical therapy and psychological approaches; needs of special populations: children and patients with learning disabilities. **Paul Christo, MD, MBA**

4:00pm–4:45pm

Headache and Facial Pain

Anatomic, physiologic, and psychosocial aspects; major hypothesis about mechanisms of headache and orofacial pain; systematic case history, use of diaries, selection of appropriate examination based on history, and diagnostic studies; internationally accepted diagnostic criteria for classification of headache disorders; indications for further investigations of headache; physical, psychological, and social factors contributing to headache and orofacial pain, along with role of counseling and other non-pharmacologic treatment; role of medication overuse; and pharmacologic treatment and alternatives. **Ralph Justiz, MD**

4:45pm–5:15pm: **POST TEST**

5:15pm–6:15pm: **REVIEW OF QUESTIONS**

DAY 5

FRIDAY AUGUST 5, 2011

7:00am–8:45am: **REGISTRATION & CONTINENTAL BREAKFAST / POST TEST**

8:45am–9:30am:

Development of Pain Systems and Neonatal Pain Management

Description of development of pain behavior in the fetus and newborn; physiologic and behavioral pain assessment measures in infants; development of peripheral and dorsal horn mechanisms of nociception and nociceptive connections in higher centers; long-term consequences of neonatal pain; and other aspects of development of pain systems.

Helen Karl, MD

9:30am–10:15am

Sex and Gender Issues in Pain

The lecture describes the definition of sex and gender; role in epidemiology of pain in relation to age and reproductive history; sex differences in nociceptive response and pain perception in animals and human experimental models; analgesic response: differences between sexes and within the same sex; biologic and psychosocial contributions to pain response with sex differences; and sex differences of factors influencing the outcome of pain, experiments, or therapy. **Vikram Patel, MD**

10:15am–10:45am: **BREAK**

10:45am–11:30am

Liability, Informed Consent, and Risk Management

Medical liability for interventional pain physicians. Liability issues include malpractice, controlled substances, tort, consent, and defense. **Michelle Drake, JD**

11:30am–12:15pm

Pain in Infants, Children, and Adolescents

The lecture includes developmental, behavioral, pharmacokinetic/pharmacodynamic differences among infants, children, and adolescents; factors affecting pain perception; treatment of pain utilizing pharmacologic and non-pharmacologic modalities; use and limitations of pain assessment tools in children; special considerations in management and palliative care of acute and chronic pain in children; and ethics of study and treatment of pain in children. **Helen Karl, MD**

12:15pm–1:15pm: **LUNCH (provided)**

1:15pm–2:00pm

Documentation in Interventional Pain Management:

Various documentation, billing and coding requirements for interventional techniques with examples in various settings of practice. **Kathryn Moghadas, RN, CPC**

2:00pm–2:45pm

Controlled Substances; Regulatory Issues and Documentation

Scott Collier - DEA

2:45pm–3:00pm: **BREAK**

3:00pm–3:45pm

Fraud, Abuse, and Compliance

Introduction, prevalence, laws, and regulations pertaining to fraud and abuse in IPM.

Vicki Myckowiak, JD

3:00pm–5:00pm: **REVIEW OF QUESTIONS**

5:00pm: **ADJOURN**

DAY 6

SATURDAY AUGUST 6, 2011

EXAM

7:00am–7:45am

REGISTRATION & CONTINENTAL BREAKFAST

7:45am–12:00am

TEST INSTRUCTIONS & ABIPP PART 1 EXAMINATION
(EXAM IS 4 HOURS)

Registration Form for Review Course

Since the courses are held concurrently, please note that you can only register for the Board Review Course OR the Controlled Substance Management and Coding, Compliance and Practice Management Review Course, not both.

YOU MUST REGISTER SEPARATELY FOR THE ABIPP EXAMINATION.
 APPLICATIONS ARE AVAILABLE AT ABIPP.ORG

Please print exactly as you wish your name to appear:
