*The Voice of Interventional Pain Management*

## Objectives

The American Society of Interventional Pain Physicians Annual Meeting and review course is offered to provide an opportunity for improving knowledge and skills regarding multiple aspects of interventional pain management.

### Application of Interventional Techniques

Managing evidence based interventional pain management with description of multiple interventional techniques in spinal pain and complex regional pain syndrome.

### Controlled Substance Issues

Discuss a multitude of issues related to controlled substance use and abuse in interventional pain management including controlled substance pharmacology, evaluation of controlled substance use and abuse in the United States, Controlled Substance Act and DEA, the role of multiple other agencies and the importance of documentation; controlled substance abuse with discussion of prevalence and consequences, monitoring and managing abuse, multiple issues and pitfalls related to prescribing of controlled substances.

### Billing, Coding, Compliance and Practice Management

Understand multiple issues related to fraud and abuse in interventional pain management; employee management; billing and coding in interventional pain management; and practice management, compliance; and pitfalls of billing and coding.

### Advocacy

Discuss various issues facing interventional pain management along with solutions; preservation of interventional pain management through accountability, advocacy, and research; discuss evidence based interventional pain management; various business issues related to interventional pain management; and the role of physicians in preserving interventional pain management and the role of activism.
