

# Welcome to

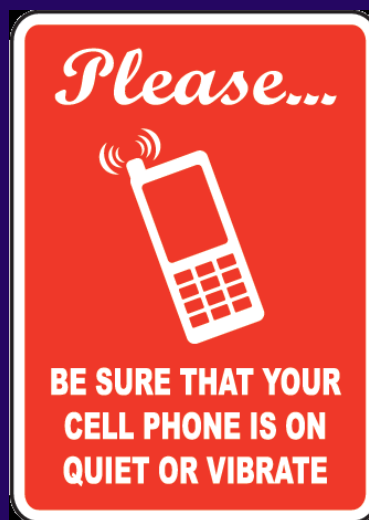

Laxmaiah Manchikanti. MD

Thank you All !!  
For Attending  
This Annual Meeting

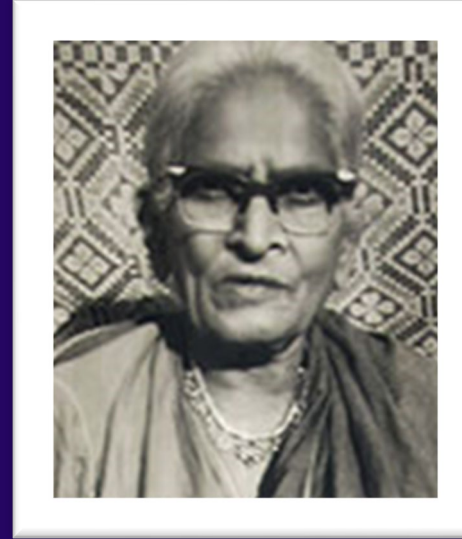

A large, stylized number '24' rendered in a golden-brown, three-dimensional font. The '2' features a prominent swirl at the top, and the '4' has a thick, horizontal crossbar. The number is set against a dark blue gradient background.

Years and going

# Thanks to Sanctuary Systems for Providing Masks

### 4-Ply Medical Isolation Mask Level III

High Efficiency Electrostatically Charged Meltblown

Model SSFM03

**50 Count**  
5 Packs of 10

Accredited Independent  
3rd Party Testing

- Class 1 FDA Registered Medical Device
- >99.9% BFE, Bacterial Filtration Efficiency, ASTM F2101-19
- >95% PFE, Particulate Filtration Efficiency, TEB-APP-87P-0059
- ASTM D1230 Flame Test; Pass
- <15mm H2O pressure drop
- Level III; ASTM F1862 Synthetic Blood Penetration Test
- JIS 112 L 1041 Formaldehyde Detection Test; Formaldehyde Free
- ASTM F2853-10 Metal/Lead Screening Test; Lead & Metal Free
- Latex Free

Exceptional Protection  
Exceptional Lightweight Comfort

This FDA-registered facility has a maximum manufacturing capacity in excess of one million face masks per week. Sanctuary Systems customers receive the quality face masks they need while helping to strengthen the US supply chain for PPE. Our process includes a continually audited Quality Management System (QMS). Operating in a transparent manner, we make Breatheze test reports available to customers.

All of our masks are made at our facility in Fremont, North Carolina from materials made in the USA. We have our own laboratory for in house R&D and quality controls. We use accredited independent third-party Labs for verification.

Why choose our products from all of those available on the market?

Value. We understand why masks are needed in healthcare environments. Healthcare organizations worry about nosocomial infections as well as infections brought into the facility by patients and visitors.

Wearing a mask with high filtration properties, that seals around the face helps protect the wearer and those around the wearer.

Proper PPE in addition to other precautions help Healthcare Organizations save money by preventing down time with sick employees and having to treat infections brought on by the organization itself.

Value is a function of quality and price. Many companies sell face masks that are cheap. Cheap made in China masks frequently fail filtration tests and do not seal around the wearers face.

We sell products that are of substantial quality for a reasonable price, and that combination results in Exceptional Value.
