DESCRIPTION

This Lumbar Endoscopic Spinal Decompression course includes 1 day of didactics and 1½ days of cadaver workshop. Lumbar Endoscopic Spine Decompression is a minimally invasive procedure that can help relieve pain, numbness and decreased mobility caused by nerve pressure created by a ruptured, herniated or bulging disc. This technique is performed by inserting a small instrument under X-ray guidance through the skin to reach the affected disc and provide treatment.

The course will include the following:

- Most comprehensive Lumbar Endoscopic Spine Decompression Course available in the United States
- Overview of Lumbar Disc Herniation and Spinal Stenosis
- Manipulation and placement of needle and scope
- Technical considerations of spinal decompression
- Indications and efficacy of Endoscopic Discectomy
- State-of-the-art Cadaver lab
- Space limited to 4 physicians per station

OBJECTIVES

- Attain understanding of Lumbar Endoscopic Spine Decompression
- Attain eligibility for competency certification
- Integrate new and progressive interventional pain management techniques in treating your patients so that patients have better outcomes and reduced side effects
- Provide high-quality, competent, safe, accessible, and cost-efficient services to your patients
